1. The disclosure is objected to because of the following informalities: The status of the parent application in the claim for priority inserted at page 1, lines 3-6, of the specification should be updated. Appropriate correction is required.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 46 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 6,635,618. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '618 patent anticipate the instant claim. See especially claims 20 and 21 of the '618 patent. Note that process limitations do not impart patentability to product-by-process claims where the product is otherwise anticipated by or obvious over the reference(s) being applied.

4. Claim 46 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 32-51 of copending Application No. 10/436,341. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '341 application anticipate the instant claims. Note that process limitations do not impart patentability to product-by-process claims where the

Art Unit: 1654

product is otherwise anticipated by or obvious over the reference(s) being applied. Also note that claims drawn to a product are anticipated by a composition comprising the product.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 32-38, 41-44, and 46 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of copending Application No. 10/226,428. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '428 application (see especially claim 1, step (c)) anticipate the instant claims.

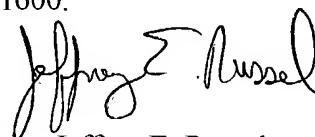

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Claims 39, 40, and 45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record does not teach or suggest compounds having the formulas recited in instant claims 39, 40, and 45. See, e.g., the prosecution of parent application 09/847,042. Accordingly, methods of making these compounds are also novel and unobvious over the prior art of record or any combination thereof.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (571) 272-0969. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.

The fax number for formal communications to be entered into the record is (703) 872-9306; for informal communications such as proposed amendments, the fax number (571) 273-0969 can be used. The telephone number for the Technology Center 1600 receptionist is (571) 272-1600.
